## SAPUI5 for ABAPer's - Session 1 Assignment

- We will be making an invoice search report similar to the Purchase order report which we have done in our livestream.
- Create a page with 3 input fields Invoice Type, Invoice Number and Company Code
- Add a Search invoice button
- On press of search button it shall display Searching Invoices.

### \*\*\* Try this \*\*\*

- Add an icon to the Search invoice button
- Add an image at the beginning of the view.
- While clicking search button pass some hardcode text from the view and display it in message toast
